Road Construction Approved for Mountain Areas

On Tuesday, the San Bernardino County Board of Supervisors approved three projects to improve mountain roads for the residents. All three projects involve the replacement of the retaining walls to ensure adequate slope protection for residents and motorists.

The first project is located on Arrowbear Drive at the intersection of Highway 18, in the Arrowbear Lake area. The second project is located at 538 Arrowhead Villa Road in the Lake Arrowhead area. Both projects were awarded to the lowest bidder, Trinity Construction. The third retaining wall replacement project, located on Secret Drive just south of Encina, in the Running Springs area, was awarded to TK Construction, who was the lowest bidder.

“Replacement of retaining walls is unique to our mountainous communities, but they are tremendously important to ensuring the safety of our residents and visitors,” said Third District Supervisor Dennis Hansberger.

The Department of Public Works expects all three projects to commence by the end of April with completion by the end of May 2008.
